Buyback Service

RECYCLE YOUR BOOKS

In order to maximize your textbook investment, Specialty Books provides you with an opportunity to sell your books for cash, allowing you to get some financial return while providing other students the benefit of a “recycled” book. The buyback program also allows Specialty Books to replenish its inventory, increasing used book availability and helping maintain low prices.

HOW DOES THE SERVICE WORK?

Specialty Books, in partnership with a national used book wholesaler, may offer to purchase your books at a nationally established price. Experienced representatives will quote you a buyback price, and then you may decide if you would like to resell them.

HOW MUCH DO I GET FOR MY BOOKS?

The value of your textbooks is determined by national wholesalers and depends on several factors. National demand for a particular title is a major factor in determining the buyback value. Obviously the greater the demand, the greater the value of the book. If there are sufficient quantities of your book in stock at national wholesalers to meet future demand, the book will have little or no value. The condition of the book also affects the value. Minimal to moderate highlighting or underlining is acceptable; however, if there are excessive markings, missing or torn pages, or damaged covers or bindings, the book will have no resale value.

As a general rule, the value of a book can range from no resale value up to 40% of the new book price. Again, based on the factors stated above, the value of the book will vary. Buyback prices are updated ten times per year to reflect changes in the market, and it is important that you act quickly when our buyback representatives provide price information to you. Used study guides, working papers or lab manuals, custom published materials (materials made specifically for your class), audio and video tapes, and computer software will generally have no resale value.

*PLEASE BE AWARE THAT THE VALUE OF YOUR BOOKS CAN VARY FROM NO RESALE VALUE UP TO 40% OF THE NEW BOOK PRICE.

SPECIALTY BOOKS BUYBACK PROCEDURE

- Call, e-mail, or go **online** for specific buyback price information and a return authorization number.
- You will need to provide the 10- or 13-digit ISBN (International Standard Book Number) located on your invoice. This number frequently appears on the back of the book as well. **Please note that you should not submit any ISBN that is located on the inside cover of your textbook. We may return any books submitted to us under this number. Some books require the return of the CD, access code, or other material that came with the book in order for you to receive the buyback value. Specialty Books also reserves the right to classify books with excessive marking or highlighting as damaged, at which time these books will be returned to you at your cost.**
